

Polysistec started its activities in 1995, initially focusing on the design, manufacture and sale of chemical products for the textile industry. Later in the year 2005 the company began a diversification strategy creating the Industrial Business Unit which offers products for different sectors.

The continued research for new products and applications along with a policy of sustainability and respect for the environment have led to a progressive and constant presence in markets around the world.

In the facilities of Castellar del Vallès (Barcelona) R & D developments are performed in order to respond to each of their clients' needs. All this combined with the continued assistance provided by our Technical & Sales department, are the basis of the business.

Polysistec[®]
Polímeros y sistemas de aplicación técnica, S.L.

Polysistec is a company specialized in chemical auxiliaries. We treat textile fibers and fabrics that bring ideas and solutions with high added value. Polysistec is situated in Castellar del Valles (Barcelona) and started its activities in 1995, focusing on the design, manufacture and commercialization of chemicals for the textile industry. In 2005 a new business unit was created in order to propose new products for the industry. Today, the company is well placed in main markets worldwide.

Polysistec has its production, logistic and offices in Barcelona. A group of professionals -including distributors, agents and technicians- guarantee a continuous and highly qualified technical-assistance. The company offers fast and efficient answers in front of the needs of the market and customers.

We make continuous efforts on the R+D+I of new products and applications. We carry our activities from our engagement with sustainable development, with safety conditions for the people and environment and a safe use of the chemicals during its whole cycle of life. In this regard, POLYSISTEC fulfills the requirements stated by the ECHA and REACH declaration. The company is registered under ISO 9001 and 14000 certifications.
